

DEFENSELOGIX CMMC TRAINING

CMMC training your team *truly understands.*

Most compliance training gets clicked through and forgotten. This program is designed so people take part willingly, take the material in, and understand it well enough to use it at work.

Every lesson is built around the real decisions people face with Controlled Unclassified Information: an unexpected email, a visitor at the door, a file that needs sharing. People learn by making those calls, getting them wrong safely, and seeing why.

The records your CMMC Level 2 assessment needs are captured along the way.

My Training

Welcome back, Alex. 6 modules left in CMMC Workforce Training (Essentials). Each one is a short read and an assessment.

Certificate

UNLOCKS

UNLOCKS when CMMC Workforce Training (Essentials) is complete and you sign the attestation.

REMAINING6

WHY THIS MATTERS

Training is a CMMC requirement

NIST SP 800-171 requires security awareness training for every user who handles contract information, and your organization has to show an assessor it was done.

CMMC Workforce Training (Essentials) • Module 1 of 6

Module 1: CMMC, FCI & CUI: Why This Applies to You

6Module 6: Incidents, Reporting & ConsequencesNOT STARTED >

What each learner sees when they sign in. Demo data.

01 • ADOPTION

People engage.

Training feels relevant, so people start it and stay with it.

Courses written for each role, not one generic deck

A clear view of what is assigned and what comes next

Short lessons that work on a phone

02 • ABSORPTION

People take it in.

Lessons are built on how adults actually learn.

A first guess about a real situation primes attention

One idea at a time, never walls of text

Practice decisions, with feedback that explains why

03 • UNDERSTANDING

People can apply it.

Understanding is shown, not assumed.

A closed-book check using new scenarios

The questions an expert asks, made explicit

Concrete actions for their own job this week

TRAINING FOR EVERY ROLE

Workforce Essentials	everyone with CUI access	Managers & Access Approvers	supervisors
System Administrators	IT	Security Leads & Incident Response	security team
HR & People Operations	HR	Facilities & Physical Security	facilities, reception
Affirming Officials & Executives	leadership	All 110 Level 2 requirements	cited to NIST SP 800-171

DEFENSELOGIX.COM/CMMC-TRAINING

1

UNDERSTANDING, ROLE BY ROLE

What your people will know how to do.

All staff: handling CUI

Recognize CUI, even when it is not marked, and share it only with people who need it.

Managers

Know what to check before approving access, and what to do when someone joins, moves or leaves.

HR and facilities

Know how screening, badges, visitors and departures protect CUI.

All staff: spotting threats

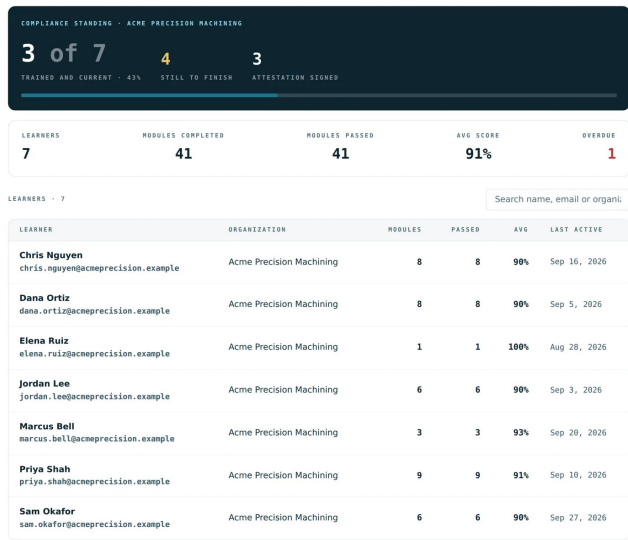

Spot social engineering and insider-threat signs, and report them instead of investigating alone.

IT and security

Understand their technical duties, and when an incident must be reported to DoD within 72 hours.

Leadership

Understands what the CMMC affirmation says, and the evidence to see before signing it.

What your admin sees. Demo data.

AND THE EVIDENCE IS BUILT IN

Compliance panel	Who is current, due or overdue.
Signed attestations	One per person, with timestamp and IP.
Certificates	Issued on completion, with renewal history.
Exports	Results and training history, for your assessor.
Renewal	Yearly, and people who still know it can test out.
Requirements	AT.L2-3.2.1, 3.2.2 and 3.2.3.
Privacy	No CUI stored. Records hosted in the US.

Try it the way *your team would.*

Answer real practice questions from the courses at defenselogix.com/cmmc-training.
Or book a walkthrough: we take you through a full lesson as a learner, then show you the admin view.
